Saskatchewan Boom Lift Training

Saskatchewan Boom Lift Training - Elevated work platforms, likewise referred to as aerial platforms, allow workers to carry out tasks at heights that would otherwise be not reachable. There are different types of lifts designed for different site applications and conditions. If operated carelessly, elevated work platforms can cause serious injury or death. The most common reasons for related accidents are electrocution, falls, crushed body parts and tip-overs. Lift operators should be completely trained in techniques in order to avoid accidents during the operation of lifts.

The Aerial Lift Safety program provides needed resources to help people required to learn how to operate these devices more effectively. Through the program, participants would receive thorough instruction. Types of lift covered comprise boom supported, scissor and articulating aerial lifts. The video presents the right techniques operators must follow. Instruction focuses on preoperational inspection, protection against falls, safe driving procedure and stability of the device.

The boom lift training program would help to address equipment reliability and employee safety, utilizing materials that are fully compliant with your local and regional requirements and regulations. Course management and training techniques will be taught. The trainer will likewise know the technical aspects of aerial lift safety.

Both practical training and classroom training are parts of the Aerial Platform/Boom Truck Training course. Both sessions should be completed successfully for the participant to receive a certificate of achievement.

The self-propelled boom-supported elevating work platforms are different from the self-propelled elevating work platforms in that they are able to position their work platforms totally beyond the base of the equipment. The theoretical component of the training is practically the same for both types. The practical part of the training could be finished more quickly if just one kind of machine is used.

Elevating Work Platform Training Program Objectives:

For the safe operation of Boom-Type Elevating Work Platforms and Self-Propelled Elevating Work Platforms, boom lift training would help operators use their equipment more efficiently and would reduce the possibilities of workplace accidents. Trainees will review of company policies and applicable regulations, discuss Due Diligence, review Criminal Negligence and consequences to trainers, employers, supervisors and employees. Participants would study machine features, operating procedures, stability, charging/fueling procedures and parking. Site-specific safety issues will be dealt with.
