Saskatchewan Counterbalance Forklift License

Saskatchewan Counterbalance Forklift License - When operated by fully trained operators, forklifts could become a major advantage for companies and firms. We could offer your workers a thorough training program which includes all aspects of operating a powered lift device. Counterbalance forklift training offers operators of forklifts with the practical skill sand understanding required to operate forklifts efficiently and safely. The particular program offers a combination of classroom theory, participant observation and hands-on training in a warehouse-type atmosphere. Training could be on site and/or customized.

The course goes through the lift truck fundamentals, rules and regulations, parts, factors affecting stability and load centres. Procedures regarding the general operation of the forklift is taught, in addition to circle checks, startup, shutdown, forward/reverse on level ground, and operating around other individuals. Load handling subject matters include load pickup and placement, selection of loads, load security and integrity, loading and off-loading trailers. Individuals participating will learn operational maintenance procedures, like for example recharging and refueling. Workplace safety concerns would be discussed. Individuals participating will learn about the environmental conditions affecting the performance of the lift truck and be able to identify potential hazards. Advanced training on propane handling could be incorporated.

Both employers and employees could deal with severe penalties if industry and national rules are not followed in the operation of forklifts. Employees who operate a reach truck or forklift should be well-informed concerning the guidelines regarding their safe operation. Training is recommended for anybody applying for work which needs forklift operation.

We provide in-class theory and hands-on training inside personalized, small classes. Training choices comprise refresher or entry level courses.

Entry-level Course Outline:
This course is for anybody entering the work force as a forklift operator. Successful students should finish the program and pass a series of practical and written exams. Topics includes: basics of powered lift trucks; general operating procedures; load handling; operational maintenance; basic rules and regulations, workplace safety.
