Saskatchewan Aerial Lift Train the Trainer

Saskatchewan Aerial Lift Train the Trainer - The train the trainer program meant for aerial lifts helps to teach the trainers how to safely train prospective operators in an industrial surroundings. Trainers will be given in-depth instruction on the workings of aerial lift equipment. The program is offered on an open enrollment basis and delivered at selected training sites. Prior to certification, trainers are evaluated and scored based on their knowledge and demonstrated skills.

The Aerial Lifts Train the Trainer Certification Program focuses on practical learning and as the top training provider in the business, we offer top notch hands-on training. We give plenty of chances to practice the concepts and techniques which are learned inside the classroom. Together with hands-on experience, trainers develop general understanding of equipment theory and instructional methods, field and classroom communication skills, and ability to effectively train and evaluate operators. Trainers would gain knowledge of what traits make a successful trainer.

The Aerial Lifts Train the Trainer Program also teaches the right techniques required to express the correct information inside the classroom and field setting. There are three aspects of equipment operation which the trainer must learn how to convey to operators: what to do; how to do it; and the reason why it should be done.

The program offers up-to-date, detailed reference material to be able to help trainers convey the subject matter to machine operators. Guidebooks contain detailed information on all aspects of industrial mobile equipment operator training. Included within the package are training aids which provide a visual reference to be able to improve the learning experience. The equipment-specific training products contain important materials intended for both the operator and the trainer: videos/DVD's, overhead transparencies, kinds of equipment, safety message posters; stability pyramids and digital training aids.
